PROBLEM STATEMENT

A Influencer Engagement and Sponsorship Coordination Platform

Spin :

The spin is a comprehensive solution designed to connect brands with influencers, manage influencer marketing campaigns, and track performance metrics. This platform aims to simplify the entire process of influencer marketing, from discovery and engagement to campaign execution and analysis.

Frameworks used:

●	●	●	●
SQLite : Data storage	Flask : Run application	Flask SQLAlchemy: Data query	HTML and Bootstrap: Front end
The spin uses SQLite to storage the data in the backend	The spin uses Flask to run the application	To query and create the database spin uses SQLAlchemy	To render the information from the people spin uses Html and bootstrap for styling
